INTRODUCTION

National Register of Historic Places

The National Register of Historic Places is the nation's official list of buildings, districts, sites, structures, and objects that are significant in American history, architecture, archaeology, and culture. The Register is maintained in Washington, D.C. by the National Park Service, U.S. Department of the Interior. Under the authority of the National Preservation Act of 1966, the states work in partnership with the federal government to expand the list according to specific criteria for evaluation.

The criteria for the National Register are based on a district's

1) physical features and characteristics, 2) historical association with events or movements of consequence in American history and culture, and 3) qualities that distinguish it from its surroundings. The National Register serves as a combination "honor roll" and planning tool.

Listing on the National Register can qualify properties in the district for federal and local tax benefits under state and federal laws.

Figure 1: Eldridge Historic District, Bellingham

The National Park Service defines a district as a geographically definable area, urban or rural, possessing a significant concentration, linkage, or continuity of sites, buildings, structures, or objects united by past events or aesthetically by plan or physical development.

The Washington Office of Archaeology and Historic Preservation and the State Advisory Council

To help the federal government administer provisions of the National Historic Preservation Act of 1966, each state has a designated State Historic Preservation Officer (SHPO). Professional staff and an advisory body aid the SHPO. In Washington, the State Historic Preservation Office is a division of the Office of Community Development, and Dr. Allyson Brooks is the State Historic Preservation Officer.

Washington's review board is officially titled the State Advisory Council on Historic Preservation. The Council consists of nine persons, four of whom are professionally qualified in one of the following disciplines: history, prehistory and/or historic archaeology, architectural history and architecture. In Washington, the Council meets three times per year. All of its meetings are open to the public and owners of properties proposed for nomination to the

State and National Register, as well as the highest elected local officials of the jurisdiction in which the property is located, are notified of the opportunity to comment on the nomination.

The Nomination Process

Nominating a district to the National Register of Historic Places is a three-step process. In accordance with Federal rules, 36 CFR Part 60, nominations are 1) first reviewed by the State Advisory Council on Historic Preservation. If approved by the Council as meeting the criteria for evaluation, a nomination is then 2) signed by the State Historic Preservation Officer, or the Deputy SHPO, and 3) forwarded to the Keeper of the National Register, who makes the final determination to list or not list the property. The process may take up to a year from the time a registration form is submitted for review, to receipt of confirmation that a property has been registered.

District nominations are often proposed by government agencies; but they may be initiated by anyone including a local historical society, a community group, or an individual. It is the preparer's responsibility to complete the form that documents the significance of the district to the community, state or nation. At the present time, 150 historic districts throughout 36 of Washington's 39 counties are listed on the National Register of Historic Places.

Why Supplementary Guidance is Necessary

Instructions and guidance for completing National Register forms are found in two federal documents: Bulletin 15, *How to Apply National Register Criteria for Evaluation*; and Bulletin 16A *How to Complete the National Register Registration Form*.

Each state administers National Register nominations that conform to the federal rules and guidelines. However certain procedures and technical requirements may vary from state to state, depending on state laws, budgetary constraints, and the priorities of the state advisory board. This document is provided as a supplement to the National Register Bulletins and to show preparers what is required to successfully complete the NR process in Washington. Preparers are advised to carefully review the following instructions concerning the required number of copies of the completed form, the processing and labeling of photographs, the assembling of maps, as well as requirements in the text of the nomination such as a discussion of the

district's developmental history. All standards and requirements outlined in this document are effective for all proponents of National Register nominations in Washington. No exceptions will be made.

A complete list of the National Register Bulletins which give detailed guidance on specific documentation issues and resource types is included in Bulletin 16A. Copies of most of the National Register Bulletins are available from the Office of Archaeology and Historic Preservation or from the Publications Unit, National Register of Historic Places, National Park Service, 849 C Street NW, NC 400, Washington DC, 20240.

Bulletin 15 and 16A are also available on line at:

<http://www.cr.nps.gov/nr/>.

Questions about the National Register or the State of Washington's requirements can be addressed to Michael Houser, Architectural Historian, OAHP, PO BOX 43843, Olympia, WA 98504, (360) 586-3076 or michaelh@cted.wa.gov.

Figure 2: Main Street, Spokane.

WASHINGTON'S PROCESS FOR NOMINATING DISTRICTS TO THE NATIONAL REGISTER

General

The national historic preservation program, authorized by the National Historic Preservation Act of 1966, operates as a partnership of federal, state and local governments. State and Federal Historic Preservation Officers nominate historically significant properties to the National Register of Historic Places. Since the nation's cultural heritage is a cross-section of properties that are significant to local communities, states and/or the nation, properties are eligible on several levels. Also, districts of national significance, such as Fort Worden in Port Townsend, may be given a designation of National Historic Landmark by the Secretary of the Interior under a separate program.

The Nomination Process

The listing of a district in the National Register is a process established by federal rules in 36 CFR Part 60. The process varies only in detail from state to state. Any citizen may propose a district for listing in the National Register, but the operating rules ensure that the concerns of property owners and local governments are taken into consideration.

Before beginning the nomination process, proponents should consider contacting the Washington Office of Archaeology and Historic Preservation (OAHP) staff who can advise them with regard to the potential eligibility of the district for registration. To begin the nomination process, a proponent fills out the registration form. The form requires a general description of the district and detailed information about individual properties within the district boundaries. It also requires a statement of the district's historical significance, which is adequately supported by research. The form must be complete before it is accepted for processing. Applications are screened by staff for completeness and accuracy of essential points, and proponents may be requested to revise or supplement the form. For those who are not experienced in completing registration forms, advance submittal of a rough draft form for the staff's informal review and comments can be very helpful. Some proponents hire a consultant to prepare the registration form. Hiring a consultant is a matter of personal choice, not a requirement. You can contact OAHP for a list of qualified consultants who can prepare National Register district nominations.

Before the Advisory Council hears the nomination it is assumed that numerous informal and formal meetings would have been held in the jurisdiction in which the nomination is from, thus giving the public ample time to comment on the nomination. Letters of support from a city council/county commission, historical society, a downtown association or other appropriate agencies can assure OAHP that the nomination has been

reviewed and approved at the local level. OAHF staff are available to attend public informational meetings to help answer questions about National Register designation.

The next step in the nomination process is a review of the registration form by the State Advisory Council on Historic Preservation. The Council must recommend a district for nomination if the process is to continue. If the Council recommends that a district does not meet the criteria for evaluation, the nomination process for that district stops. In such a case, the state's decision may be appealed to the Keeper of the National Register under Federal rules.

The state notifies property owners and local governments of their opportunity to comment between 30 and 75 days before a district is to be considered by the Advisory Council. An objection to register listing from an individual owner or local government does not prevent the Council from reviewing the nomination, but owner objection to the listing from fifty-one percent of the privately-held properties will prevent the district from being formally listed. The State Advisory Council is informed of any known objections by the staff at the meeting, and anyone may present testimony to the Council regarding the proposed district. The Council will then make its recommendation regarding whether or not the nomination meets the criteria for evaluation. A district is listed on the National Register based solely on the objective review of the application and its ability to meet the criteria for evaluation.

Properties that are in public ownership are treated differently from privately-held properties nominated to the National Register. Although statements of objection to listing a publicly-held property will be taken into consideration by the Keeper of the National Register; under federal rule, such objections will not preclude the listing of a district that is in public ownership.

Meeting Schedule and Due Dates for Applications

In Washington, proponents of district nominations are required to submit a draft nomination to the OAHF staff prior to its scheduling on the agenda of the State Advisory Council on Historic Preservation. The due date for the receipt of the first draft application is generally four months before the

meeting. The Council customarily meets for the purpose of reviewing nominations to the National Register in **January, June and September**. For the exact due dates, please contact OAHP at (360) 586-3076 or visit our web site at: <http://www.oahp.wa.gov>. The deadlines for review are final and must be observed to ensure the proper handling of applications in accordance with the federal rules and regulations.

The Washington Office of Archaeology and Historic Preservation maintains a policy of scheduling caps for the number of applications to the National Register that will be presented to the State Advisory Council on Historic Preservation during a given meeting day. Even when technically complete, applications which are received after the fixed due-date for one of the regular meetings, and those received after the per-meeting-day scheduling cap has been reached, will be deferred for consideration at the next available meeting.

Due to the complexities of district nominations, sometimes review of a district nomination may extend over two meetings of the State Advisory Council on Historic Preservation. During the initial presentation, the premise and

scope of the application, an overview of contributing and non-contributing resources and other appropriate aspects of the nomination proposal are reported. During a subsequent meeting, after the final, detailed presentation is made, the Council may act to approve the nomination.

Nomination Review Process

During the meeting of the State Advisory Council on Historic Preservation, staff will present a short summary of each nomination on the agenda to introduce the nomination to the Council and the public. Staff recites the applicable criteria for evaluation and expresses an opinion with regards to NR eligibility. Proponents of historic district nomination submissions are then required to make their own formal slide presentation about the district.

Next the chairman of the State Advisory Council on Historic Preservation calls for comments from the proponents and opponents of the nomination, allocating time to each as equitably as possible until all parties have been heard. Once a motion has been made, and following due discussion, the Advisory Council votes on the eligibility of the district at the second reading

for inclusion into the Washington Heritage Register and then into the National Register of Historic Places. *Note: All National Register districts are also added to the State Heritage Register.*

Figure3: Northern Life Tower, Seattle.

The Council may, at its discretion, defer action on a nomination. Valid reasons for deferral include lack of quorum, lack of sufficient information on which to base a professional judgment, or the decision to request particular advice from a local landmarks commission or public official.

Under federal rules, 36 CFR Part 61, political subdivisions of the state which have qualified for expanded participation in the federally-assisted national historic preservation program are recognized as Certified Local Governments (CLG's). CLG's are required to review National Register nominations that are located within their jurisdictions. An evaluation by a landmarks commission or historic review board must be conducted at a formal public meeting. As such, a CLG is required to submit an evaluation form to OAHF at least five days in advance of

the State Advisory Council meeting. Nominations within the jurisdiction of a CLG will not be heard by the Council without confirmation of formal CLG review and receipt of a completed CLG NR evaluation form. A copy of the evaluation form is supplied in the appendix of this document.

Completing the Nomination Process

When a district has been recommended for listing by the State Advisory Council, the proposed nomination, pending any technical corrections, passes formally to the State Historic Preservation Officer (SHPO). The SHPO is appointed by the Governor and is directly responsible to the Governor for the nomination process. SHPO staff works with the proponents of approved nominations to complete any required revisions. When the nomination form and its exhibits are accurate and complete, the SHPO or Deputy SHPO makes the formal nomination to the Keeper of the National Register via their signature and approval of the nomination.

If property owners have objected to the listing of the district, a copy of each of the objection letters is forwarded to the Keeper. If fifty-one percent of the property owners within the boundaries of the district object to the listing, the district cannot be listed, but the district application may be forwarded to the Keeper of the National Register for a formal determination of eligibility. The

Keeper's official determination of whether a district is eligible for inclusion to the National Register makes it easier for the district to be listed in the future if the opposing property owners should withdraw their objection at a later date. A formal determination of eligibility also helps protect the district from adverse impacts from federally sponsored projects.

When all is in order, the nomination is forwarded to the Keeper of the National Register in Washington, D.C. for registration. The Keeper's staff reviews the nomination for technical accuracy and, at a minimum, verifies that the criteria for evaluation have been applied appropriately. Sometimes more substantive analysis may be required. If the nomination clears this final review, the registration form is signed by the Keeper of the National Register and the district is officially added to the register.

Figure 4: Pioneer Square District, Seattle.

Results of Listing a District to the National Register

General

The listing of a district on the National Register of Historic Places not only provides recognition of the district's historic importance in the community, state or nation, it also assures protective review of federal projects that might adversely affect the character of the district. If a district is listed on the National Register, certain federal investment tax credits for rehabilitation and other provisions may apply to individual properties within the boundaries of the district.

Listing on the National Register does not mean that limitations will be placed on the properties within the district by the federal government. Public visitation rights are not required of owners, and alterations or even the demolition of properties are not reviewed by any federal or state government entity, however review may be required on a local level. Be advised though that incompatible alterations or the demolition of multiple resources may result in the de-listing of the district from the National Register.

The federal government will not attach restrictive covenants to properties within the district. It is possible that certain protective zoning measures may apply under a local ordinance. Check with your local government for any such restrictions.

Eligibility for Federal Tax Provisions

If a district is listed on the National Register, certain federal tax provisions apply. The Tax Reform Act of 1986 revised the historic preservation tax incentives authorized by Congress in earlier statutes. This new act established a 20 percent investment tax credit for rehabilitating historic commercial, industrial, and rental residential buildings which are defined as contributing buildings within an historic district. For non-contributing buildings, a ten percent investment tax credit is available for office or industrial use buildings built before 1936.

Figure 5: Cama Beach Resort, Camano Island

The Tax Treatment Extension Act of 1980 provides federal tax deductions for charitable contributions for conservation purposes of partial interests in historically important land areas or structures. Whether these provisions are advantageous to a property owner is dependent upon the particular

circumstances of the property and the owner. Because the tax aspects outlined above are complex, individuals should consult legal counsel or a local Internal Revenue Service office for assistance and more complete guidance. For further information, refer to 36 CFR 67, or call Stephen Mathison, Historical Architect with the Washington Office of Archaeology and Historic Preservation, at (360) 586-3079.

Consideration in Planning for Federally Funded, Licensed, or Assisted Projects

Section 106 of the National Historic Preservation Act requires that all federal agencies allow the federal Advisory Council on Historic Preservation to have an opportunity to comment on all projects which may affect historic properties listed on or eligible for listing on the National Register. The federal Advisory Council on Historic Preservation is a different body and has different responsibilities than the State Advisory Council on Historic Preservation referred to elsewhere. For further information, please refer to 36 CFR 800, or call Greg Griffith, Deputy State Historic Preservation Officer at (360) 586-3073.

Consideration in Issuing a Surface Coal Mining Permit

The Surface Mining and Control Act of 1977 requires a consideration of historic values in the decision to issue a surface coal mining permit. For further information, please refer to 30 CFR 700.

Qualification for Federal Historic Preservation Grants

Congress may appropriate funds to the Historic Preservation Fund or other accounts at levels sufficient to offer matching grants to the owners of properties listed on the National Register. Such matching grants are not available at the present time.

Special Valuation

In 1985 the Washington State Legislature determined that the preservation of the state's historic resources was an important goal and allowed "special valuation" for certain historic properties within the state. Under the program, rehabilitation costs, which must be equal to at least 25% of the assessed value of a structure prior to rehabilitation, are

Figure 6: Devenish Ranch, Ritzville

subtracted from the assessed value of the property for a ten-year period. Only communities which have passed rules and regulations for Special Valuation as defined in state law (RCW 84.26.050) can offer the Special Valuation Program for owners of historic properties. Check with your local planning department to see if your project qualifies.

Special Consideration with regard to Building Code Requirements

Under Section 3403.5 of the Uniform Building Code, and the Washington State Historic Building Code Chapter 51-19 WAC, National Register properties and other certified historic buildings are eligible to be considered for waivers of certain normal code requirements in the interest of preserving the integrity of the property. Contact your local building official for further details.

Rights of Property Owners

The owners of private property listed on the National Register surrender none of their rights to the property. There is no requirement or expectation that the property will be made available for public visitation or inspection, or that it will be rehabilitated or restored. National Register listing does not guarantee protection of the property or prevent its demolition.

COMPLETING THE REGISTRATION FORM: WASHINGTON'S SPECIAL INSTRUCTIONS AND REQUIREMENTS

General

The National Register registration form (NPS 10-900) is designed to facilitate the entry of data into an automated storage and retrieval system known as the National Register Information System (NRIS). In certain data blocks, the preparer of the form will be asked to select from standardized lists the category and subcategory which most clearly fits the situation. Preparers are referred to National Register Bulletin 16A, *How to Complete the National Registration Form*, for step-by-step instructions, appropriate criteria for evaluation, and code lists. Examples of registration forms completed in Washington are available to supplement this guide.

Registration forms must either be typewritten or the product of a word processor. A template for the registration form is available from the Washington Office of Archaeology and Historic Preservation and can be used with any word processing software that runs on an IBM-compatible computer. Preparers can ask for a free copy via e-mail or may send a 3.5 inch formatted disk to OAHP for a copy of the template.

Requirements for Submission

Only one single-sided copy of the form is required for submission to the OAHP. This includes the NR form and its accompanying documentation, including Assessor's or plat map showing district boundaries, and other exhibits. These documents should not be stapled, punched, or bound in any manner, and should be arranged in the following order:

1. registration form,
2. Assessor's or plat map (8 ½" x 11"),
3. USGS Quad (8 ½" x 11" excerpt from the map with district boundaries outlined and corners numbered),
4. ID map showing individual identification numbers of resources,
5. map showing the location of contributing vs. non-contributing properties (8 ½" x 11" format),
6. any additional exhibits in 8 ½" x 11" format,
7. properly labeled photographs (2 sets of B & W 5" x 7" photos),
8. color slides of the district (representative district and individual property views),
9. a full size US Geological Survey Topographic Map,
10. a copy of the nomination saved to a 3.5 disc
11. a comprehensive list of properties within the district
12. an overall community map, which shows the relationship of the district to the surrounding environment.

13. CLG evaluation form (if the district is within a CLG)
14. and a list of property owners' names and addresses if under 50 property owners (as per 36 CFR 60.6).

More details on the preparation of the exhibits follow. To be scheduled for review, a nomination must be complete, with all photographs and slides.

The submitted nomination does not need to be on archivally stable paper. Staff at the OAHP will copy the nomination onto archivally stable paper before sending it to the National Park Service.

District Location Codes

It is the responsibility of preparers of the registration forms to accurately identify the local jurisdictions in which the district proposed for the nomination is located. Though seemingly straightforward, this can be confusing for districts that are located near corporate limits of a town and for districts in urban areas where city boundaries may spread from one county into a neighboring jurisdiction. In rapidly urbanizing areas, corporate boundaries change periodically.

The consequence of not verifying the current, correct political subdivisions for the district is that the appropriate local governments are not notified of their opportunity to comment on a nomination. When this happens, the nomination review is invalidated under the federal regulations, and the comment period and review period must start again from the beginning.

For quick reference, the following location codes for Washington are repeated from Bulletin 16A.

The code for the state of Washington is: WA.

001	Adams	039	Klickitat
003	Asotin	041	Lewis
005	Benton	043	Lincoln
007	Chelan	045	Mason
009	Calallam	047	Okanogan
011	Clark	049	Pacific
013	Columbia	051	Pend Oreille
015	Cowlitz	053	Pierce
017	Douglas	055	San Juan
019	Ferry	057	Skagit
021	Franklin	059	Skamania
023	Garfield	061	Snohomish
025	Grant	063	Spokane
027	Grays Harbor	065	Stevens
029	Island	067	Thurston
031	Jefferson	069	Wahkiakum
033	King	071	Walla Walla
035	Kitsap	073	Whatcom
037	Kittitas	075	Whitman
		077	Yakima

Narrative Description for Districts

The National Register form consists mainly of two essays. The first describes the physical character of the district as a whole and the individual properties within the district and the second gives the historical or cultural background of the district as a whole stating why it is significant. The two narratives are of equal importance. The first verifies the essential integrity of the district; the second states why the district meets the National Register criteria for evaluation.

Describing the Overall Character of Historic Districts

To document the cohesive visual character of a district as a whole, a summary description should precede a property-by-property inventory of the resources within the district. A good overall characterization should include:

General

- Geographic location and topography
- Size and state of preservation
- Typical building types, styles, intrusions
- Range of construction dates
- Plat characteristics (gridiron, contoured, etc..)
- Natural and developmental boundaries
- General physical relationship of buildings
- General condition of buildings

Vistas and landscape features

- Park or parkway development
- Open spaces
- Principle vistas, internal and external
- Street width, street surfacing, sidewalks
- Street lighting, overhead lighting
- Alleyways and outbuildings
- Plantings and fence enclosures

Describing Individual Buildings within Historic Districts

For historic districts, whether urban or rural, a property-by-property inventory should be compiled. Each separately held tax lot within the district boundaries **needs to be assigned an site identification number and a classification** which indicates whether the property contributes to the significance of the district. Each property should be listed numerically by address within an alphabetical street-by-street list. Property inventory numbers should be assigned in a logical, easy-to-follow sequence, and keyed on a map displaying the district boundaries and legal lot lines. The depth of the description and cultural data will depend on the size and complexity of the nomination.

Preferred Arrangement for Description Listing of Property in Historic Districts

--

Every property will fall into one of the four categories as defined below. Washington's system for classifying contributing status in historic districts is based, not on prominence or associations, but simply on the property's ability to clearly convey its period of development. For historic districts in Washington, the built date and visual integrity are used to determine whether a property "contributes". Identifying the district's overall historic period of significance is an important first step.

Figure 8: S. "J" Street Historic District, Tacoma

Under Washington's guidelines for Special Valuation, a tax incentive program that encourages the rehabilitation of historic properties, only those owners of properties that are individually registered or registered as a "contributing" resource within an historic district are eligible to apply for the benefit. Don't forget to evaluate accessory buildings, such as garages or sheds, and to assign those structures a category as well.

The following categories for the classification of properties in a historic district include:

Historic Contributing: Properties that were built during the historic period of significance and retain sufficient integrity in location, materials, design and setting, workmanship, feeling and/or association to convey a sense of history.

Historic Non-Contributing: Properties that were built during the historic period of significance but do not exhibit sufficient historic integrity in location, materials, design and setting, workmanship, feeling and/or association to convey a sense of history.

Non-Historic Non-Contributing: Properties that were constructed after the period of significance for a district.

Vacant: A parcel of land that is undeveloped. Vacant parcels are of neutral rank in the classification system used in Washington. They are counted neither as Contributing or Non-Contributing resources.

All district nominations should include a series of maps which indicate the classification of properties within the boundaries of the district. Nominations should include an overall community map, which shows the relationship of the district to the surrounding environment. Preparers may submit additional maps such as one that indicates the distribution of style and ages of properties within the district. All nominations need to include a table, which has a quick listing of

all of the properties within the boundaries of the nomination. The table should include historic name, address, site identification number, classification and built date.

Guidelines for Determining Contributing Status in Historic Districts

The following rules of thumb are offered to help preparers of district nominations to distinguish between those properties which contribute to the historic character of the district and those which no longer can be considered to contribute as a result of alterations. These rules of thumb apply equally to buildings in commercial districts and residential neighborhoods.

306 W Center	Pice, Robert & Joyce	24	Hist Contributing	1917
307 W Center	Nammon, William & Mary House	24	Hist Contributing	1912

If the building was constructed during the period of significance and displays characteristics that make it readily recognizable as an example of a particular architectural style or vernacular type, it meets the basic test for contributing status. All that remains is to visually evaluate the building's integrity. To qualify as "Contributing" a building should rate high on the positive side of the checklist. Several marks on the negative side may indicate the building should be classified as a "Historic Non-Contributing" property in its current condition.

If proponents are unclear as to the level of integrity of properties, they are encouraged to consult with the staff at the OAHF. Typically the staff will conduct a site visit with the proponent in order to better assess the resources that are being nominated.

EXTERIOR ELEVATIONS – SIDING

YES		NO
	Original siding materials are intact.	
	Secondary siding, applied during the historic period of significance, does not obscure historic detailing.	
	Historic trim, decoration and detailing around doors and windows, water tables, primary and secondary cornices, rafter tails, decorative fenestration is intact.	

EXTERIOR ELEVATIONS – CHARACTER DEFINING DETAILS

YES		NO
	A majority of the stylistic hallmarks of the resource are present. Some may be in the need of maintenance or repair, but otherwise intact.	
	Basic structural forms, such as porches, bays, wings dormers are intact and unaltered.	

WALL OPENINGS

YES		NO
	All original openings in the walls (doors and windows) are intact in size, location and trim detailing.	
	Resource has a limited replacement of historic windows with non-compatible shapes and materials. Replacement doors and windows are confined to secondary elevations and do not make up more than 10 percent of the existing openings.	
	No picture windows have been added to primary elevations that substantially alter the proportional relationship between wall plane and openings within the wall.	
	Some modification to existing openings has occurred, but the limited repositioning and reconfiguring of openings has reused or duplicated historic detailing.	
	The original historic windows and doors are intact.	
	Wood, painted or enameled, or anodized aluminum storm windows have been installed, thus preserving the original windows.	

PORCHES

YES		NO
	Original stylistic features (columns, railings, stairs, deck, scroll work, etc.) and materials are intact.	
	The porch was replaced in the historic period of significance in a related style (ie.. a Craftsman style porch was added to replace a Queen Anne veranda).	
	The original porch has not been reconfiguration or radically altered (ie.. the replacement of a wrap-around veranda by a single bay).	
	The original porch was enclosed, wholly or in part, during the historic period, but the enclosure is compatible with historic siding and detailing of the rest of the structure.	

NEW CONSTRUCTION

YES		NO
	New stairways required under building code have been incorporated into the mass of the building and are not visible from the exterior.	
	Code variances under Section 104(f) of the Uniform Building Code were sought to retain such qualities as historic railing height and window opening size to forestall door and window replacements, second exit from upper floors, and removal of lead-based paint when existing conditions do not jeopardize health and safety.	
	The attached or detached addition is compatible in style with the original volume and is subordinate in scale to the main volume of the building.	
	Attached and detached additions are compatible with style, mass, materials, and openings of the historic volume, but are detailed with enough restraint to make them distinguishable from original construction.	
	The addition has been placed on the secondary (rear or side façades) of the structure.	

Physical Description of Individual Properties

A thorough and systematic description of a property within the district begins with a summary characterization and flows in a logical manner from the general to the specific; from the setting and exterior of the structure to the interior, from the main building or buildings to accessory features. The size and complexity of the nomination will determine the extent of the physical description. The following outline may be helpful in developing an orderly description.

Functional and stylistic type (ie.. (Gothic Revival church, Queen Anne style house, etc..)

Location and compass orientation

General Characteristics

Overall shape and basic dimensions of ground plan

Number of stories

Structural frame

Wall construction and finish materials

Roof shape and material

Foundation type and material

Special features including location, number and appearance of:

Porches (verandas, stoops, shed attachments, etc..)

Windows

Doors

Chimneys

Dormers

Other salient features

Important decorative elements (window and door trim, porch and verge board trim, etc..)

Interior

Layout of spaces

Principal features (staircases, fireplaces, etc..)

Distinguishing finish work and decorative features
Outbuildings (number, type and relative location)
Important features of the immediate environment (topographic elements,
landscape plantings, roads, water courses, etc...)
Description of modifications to property

Documenting the Integrity of Building Interiors

A well-preserved building interior is one which conveys the spatial organization, or layout, the salient features, characteristic finishes and general color character of a building's period of significance. It is uncommon to find that each space, in every story of a building is unmodified. The state of interior preservation, however, enters into overall evaluation of a property's integrity; although within a district this is significantly less important.

Architectural Classifications

The architectural history of Washington State is very diverse, and ranges from simple Greek Revival buildings of the 1860s to the more recent Art Deco structures of the 1930s. Unfortunately, architectural classifications are not always cut-and-dry and architectural terminology has been diluted by the mass media. Most buildings are a combination of several styles; but even buildings that exhibit elements of several different styles usually reflect a dominant stylistic character. In such cases, the dominant style is important to identify when compiling a National Register District nomination.

Figure 7: Sam Hill House, Seattle.

The list of architectural data categories used for the National Register Information System and the architectural classification system used for the Washington Historic Property Inventory are somewhat compatible. The state's system is more specific in order to facilitate the needs of our database system and to allow users to compare and contrast like and dis-like resources. It includes the Northwest Regional style, references to vernacular dwelling types, as well as terminology for resources built in the later part of the 20th Century, such as New-Formalism and Brutalism.

It is recommended that preparers of National Register nominations select a style category and sub category from Bulletin 16A that most closely fits the stylistic character and period of the property. The State's preferred term for the category, if it differs, may be given alongside in parentheses, and then further explained and defined in the narrative. See the **Washington State Style Guide** for a more detailed description of each separate style as follows.

Figure 8: Psychology Building, Central Washington University, Ellensburg.

What style of Home do you like?

WASHINGTON'S ARCHITECTURAL STYLE LIST

EARLY WASHINGTON BUILDINGS	1833-1870	Log Colonial Georgian Federal
CLASSICAL REVIVAL	1840-1865	Classical Revival Greek Revival
MEDIEVAL REVIVAL	1850-1910	Romanesque Revival Gothic Revival (<i>High Victorian Gothic, Rural Gothic</i>) Castellated

OTHERS	1840-2001	Vernacular <i>(Lacking stylistic character by which to categorize above)</i> Roadside Workingman's Foursquare "I" House Shotgun Gable Frontier/Homestead House

For assistance in determining the appropriate architectural classification for buildings, the following style guides can be helpful.

McAlester, Virginia and Lee, *A Field Guide to American Houses* (New York, New York: Alfred Knopf, 1989).

Poppelier, John C., S. Allen Chambers and Nancy B. Schwartz, *What Style Is It? A Guide to American Architecture* (Washington, D.C.: The Preservation Press, 1983).

Wiffen, Marcus, *American Architecture Since 1780: A Guide to the Styles* (Cambridge, Mass: MIT Press, 1969).

For assistance in selecting appropriate terminology for describing architectural features and the history of the built environment in Washington, the following are recommended.

Built in Washington: 12,000 Years of Pacific Northwest Archaeological Sites and Historic Buildings (Pullman, WA: Washington State University Press, 1989).

Ochsner, Jeffery K., *Shaping Seattle Architecture: A Historical Guide to the Architects* (Seattle, WA: University of Washington Press, 1994).

Woodbridge, Sally B., *A Guide to Architecture in Washington State* (Seattle, WA: University of Washington Press, 1980).

Statement of Significance

The second narrative section of the National Register form defines the significant qualities and associations that make a district eligible for listing in the National Register. The key to preparing a successful essay is to stay focused on the applicable criteria for evaluation and to demonstrate how the property meets those criteria. **Your narrative should state in the opening paragraph which criterion the district is being nominated under and the reasons why it follows that criterion.** Note that all primary and secondary resources used in developing the statement of significance are required to be documented in the form of footnotes or endnotes.

After selecting the area, or areas of American history, culture, or prehistory in which the district is significant, discuss the district in terms of its historic context to show why the district is outstanding. As applied to the National Register nomination process, a historic context should be an organized framework that groups information concerning the related historic resources according to

Figure 9: Main Street, Ritzville

theme, geographic limits and chronological period. More simply, the context is the social and historical background against which the prominence of the district is made clear.

Demonstrating the significance of a district calls for an understanding of the patterns, trends, or fashions in American history and culture that are represented by the nomination. It also calls for a reasonable amount of information about comparable resources in the locality, the state or the nation, depending on the district's level of significance. Knowing the resource base of the neighborhood, the city, county, or state makes it possible to judge whether or not, and on what level, the district proposed for nomination is important. This comparative analysis of the resources is an integral part of developing the historic context.

Please refer to Bulletin 16A for detailed guidance on preparing the statement of significance.

Guidelines for Evaluating and Stating the Significance of Historic Districts

To ensure that your statement of significance is complete, and that common errors and omissions are avoided, make sure the following questions have been answered:

- What are the physical features and characteristics that distinguish the district, including architectural styles, building materials, building types, street patterns, topography, functions and land uses, and spatial organization?
- What are the origins and key events in the historical development of the district? Are any architects, builders, designers, or planners important to the district's development?
- Does the district convey a sense of historical and architectural cohesiveness through its design, setting, materials, workmanship, or association?
- How do the architectural styles or elements within the district contribute to the feeling of time and place? What period or periods of significance are reflected by the district?
- How have significant individuals or events contributed to the development of the district?
- How has the district affected the historical development of the community, region, or state? How does the district reflect this history?
- How have intrusions and non-contributing structures and buildings affected the district's ability to convey a sense of significance?
- What are the qualities that distinguish the district from its surroundings?

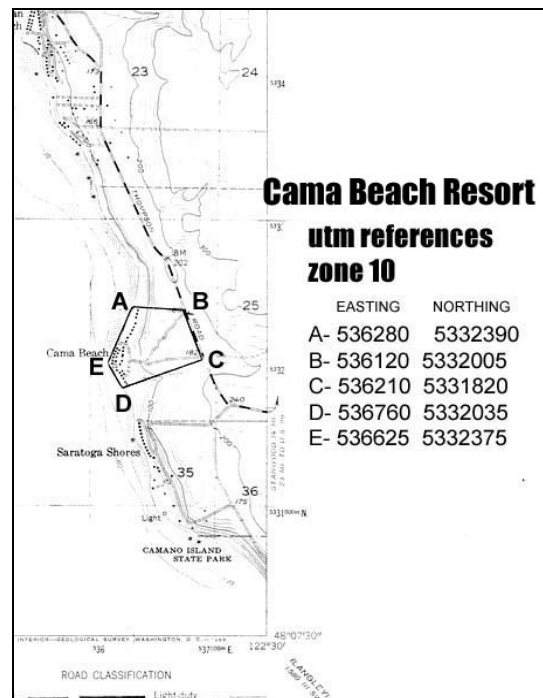

- How does the district compare to other similar areas in the locality, region, or state?
- If there are any preservation or restoration activities in the district, how do they affect the significance of the district?
- Does the district contain any resources outside the period of significance that are contributing? If so, identify them and explain their importance.
- If the district has industrial significance, how does the industrial functions or processes represented relate to the broader industrial or technological development of the locality, region, state or nation? How important were the entrepreneurs, engineers, designers, and planners who contributed to the development of the district? How do the remaining buildings, structures, sites and objects within the district reflect industrial production or process?
- If the district is rural, how are the natural and manmade elements of the district linked historically or architecturally, functionally, or by common ethnic or social background? How does the open space constitute or unite significant features of the district?
- Does the district have any resources of possible archeological significance? If so, how are they likely to yield important information? How do they relate to the prehistory or history of the district?

Geographical Data

It is important to select the boundaries of an area proposed for a nomination that encompasses, but does not exceed, the full extent of the significant, or "contributing" resources that make up the district. Typically the tax lots in which the resources are located are used as boundaries. While the area to be registered should be large enough to include all the contributing features, it should not include a "buffer zone," or additional acreage that has no relationship to the historic period of significance for the nominated district. Open space may be included if it is associated with the district historically and conveys the historic setting in visual and functional terms. On the other hand, the boundaries should not include acreage historically associated with the district if that acreage has lost its integrity due to changes.

The preparer is required to submit one full, clean original 7.5 minute **U.S. Geological Survey (USGS) Topographic Quadrangle map** which covers the location of the nominated district. USGS Quad maps are available for sale in many stationary or office supply stores, as well as outdoor sporting good stores. The preparer must submit a sufficient number of USGS quad maps to show the full scope of the district.

The boundaries of the district should be marked on the quad map using a #2 pencil. A smaller 8 1/2" x 11" map which is a portion of the larger USGS quad map should also be included in

the formal nomination. Using the Universal Transverse Mercator (UTM) grid reference system, the preparer next should pinpoint the precise location of the district. Note that the website topozone.com will calculate the UTM coordinates for you. All corners of the district's boundaries need to have UTM points associated with them. Label each point with a number and a UTM reference point. Number the points sequentially, beginning in the northwest corner and moving clockwise.

All nominations must include a concise explanation of the rationale for selecting the boundaries of the district. When the boundaries conform precisely to legally recorded lot lines, the boundary justification can be a very simple statement. The justification will require more explanation if the area is large in scope and has a complex or irregular configuration. The following is a recommended format for boundary descriptions and justifications:

Verbal Boundary Description

The nominated district is located in the NE ¼ of Section 32 south, Range 4 West, of the Willamette Meridian, in Clark County, Washington. The polygon's vertices are marked by the following UTM reference points starting from the NW corner then proceeding clockwise: A: 10 533289 – 5234237, B: 10 533289 – 522347, C: 10 5300289 – 5234247, D: 10 532459 – 5234000, E: 10 533232 – 5234500.

Boundary Justification

The nominated district encompasses both sides of Main Street in downtown Othello, from 5th Avenue to 10th Avenue.

Additional Documentation

The preparer of the nomination form is also required to submit a **County Assessor's Map** or **Plat Map** which shows the full extent of the tax lots, or portions of the tax lots that are proposed for district nomination. Don't forget to include a north arrow and a scale bar.

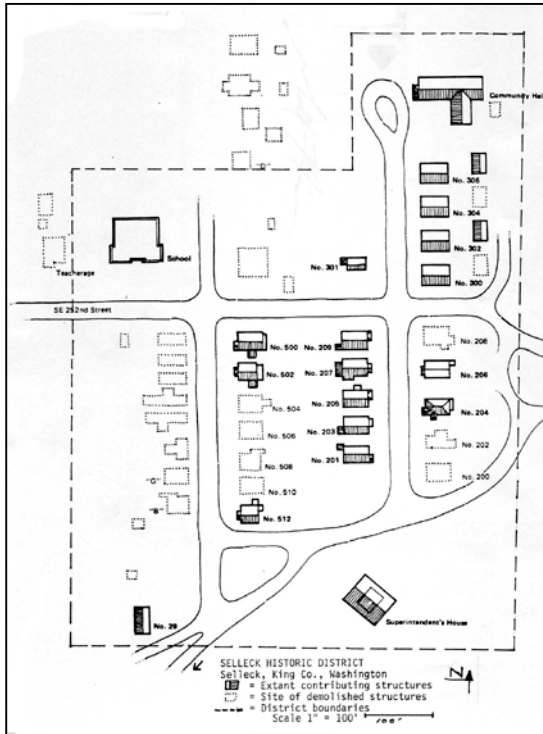

The area of the nominated district should be shaded or hatched carefully so that lot line dimensions and other information is not obscured. Photo copied portions of an Assessor's map or plat map will be accepted in lieu of the complete map provided the full map reference number is reproduced and the nominated district is shown in relationship to the nearest cross roads or road crossing of a major water course. Note that if key street or road names do not appear on the photocopied portion of the map, the road names, or road designations must be added by the preparer.

You may have to supply a base map of adequate scale or a sufficient number of Assessor's maps to show the lot lines of each of the properties within the district. Additional maps may be necessary depending on the complexity of the district nomination.

Contributing vs. Non-Contributing Map

A map which indicates the location of Contributing vs. Non-Contributing structures must be provided to supplement the narrative descriptions of the various resources. Maps can be drawn freehand or generated by a computer.

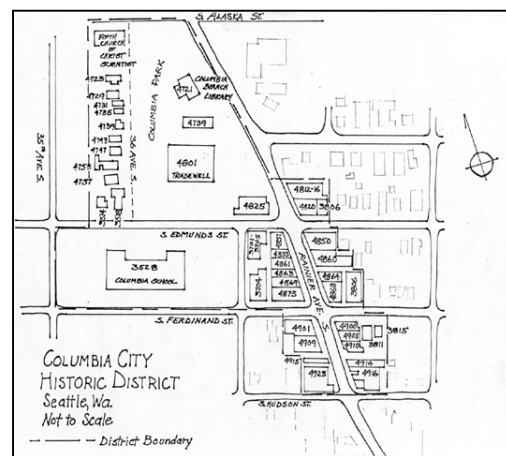

A variety of shading types, dots or other such graphic devices can be utilized to indicate the classification of properties. Note that color coding cannot be used due to the problems of reproducing multiple maps using a standard copier. Additionally color inks are not archivally stable.

The district map or diagram should be 8 ½ x 11 inches. It should also include the boundaries of the district, a north arrow and a key showing how the resources have been labeled. Additional attachments such as advertisements, logos, or Sanborn maps which tie directly to the nomination, can be provided on continuation sheets. Examples might include an advertisement for a hotel, or a promotional brochure cover.

Site Identification Map

A district site identification map should also be provided which indicates the identification number of all of the parcels or resources within the boundaries of the district. This identification number corresponds to the site-by-site descriptions in Section 7 of the National Register form. Site identification numbers should be assigned in logical easy-to-follow sequence. The map should include the district boundary lines and a north arrow.

Photographs

The preparer is required to submit **two complete sets of black and white photographs** that give an adequate representation of the district. A picture is

not needed for every resource within the boundaries of larger districts. The object is to illustrate those qualities discussed in the description narrative and statement of significance. Images of contributing, non-contributing and overall images should be provided. Photographs are to be unmounted, medium-weight, glossy or matte finish, and of good quality. Images taken on a digital camera and then scanned onto hard copy stock paper are not acceptable. Photographs should be printed on fiber-based photographic paper and developed using a black and white process. Using new technologies to process black and white images through a color processor is also not acceptable. Supplementary prints of copies of historical photographs are recommended and encouraged.

The OAHP's preferred format for black and white photographs is either 5 x 7 or 8 x 10 inches. In some cases where a large amount of photographs are needed, the OAHP will accept 3 x 5 inch photographs for the set of prints that will be retained for the OAHP's records. Please check with the OAHP staff before submitting smaller photographs to see if the format is acceptable.

All photographs should be labeled in a neat legible hand, using a soft pencil or permanent "Sharpie" marker on the back. Care should be taken in writing so the emulsion side is not broken or embossed. Do not use self-adhesive labels, because over time they will separate from the photograph and their acidity causes the photograph to deteriorate. The following format should be used to label each photograph:

- **District Name**
- **Property Name**
- **Property Street Address**
- **City, County and State where the property is located**
- **Property Identification Number**
- **Name of Photographer**
- **Date of Photograph**
- **Description of View (such as main façade, looking North, or front (South) elevation)**
- **Photograph number in relation to the complete series; for example 1 of 16**

Note: Photographs should be organized and numbered in a logical sequence, proceeding from general view to details, exterior to interior, main hall and formal rooms to private rooms, etc.

Slides

A single set of **35mm color slides** of the district proposed for nomination is required. The slides should illustrate the setting, characteristic views and details of the district. Street scene images and photographs of important contributing and non-contributing resources are needed. The number of slides required depends on the complexity of the district. 15 slides are considered to be a minimum. However, to be adequately represented, a historic district submission

could require as many as 30 or 40 slides, depending upon the scope of the proposal.

Each slide must be labeled on the front with the historic name of the property, the address, the city or vicinity, the description of the view and the county in which the resource is located. Slides should be organized and numbered in a logical sequence, moving from general setting to detailed views of individual properties. Slide labeling should appear at the bottom of the slide as viewed from the front. Please do not turn slides upside-down for labeling.

The slides can be used by the preparer of the nomination to present a summary of the application during the meeting for review by the State Advisory Council on Historic Preservation. However, after the presentation is complete the slides need to be turned over to the staff of OAHP and are retained as part of the permanent records of the office.

Keys to a Successful District Nomination

To ensure that the application is complete, and that common errors and omissions are avoided, the following is a checklist to consider:

- Has the form been checked for typographical errors and are all proper names correctly and consistently spelled?
- Is the name and address, with zip code of the property owners provided?
- Is the Assessor's or Plat map showing the boundaries or the nominated area included?
- Are acreage and boundary descriptions, and justifications for selecting the boundaries of the nominated area given?
- Is the basis for assigning the individual building's date of construction stated?
- Is the basis for attributing a building's design and construction to a particular architect or builder stated?
- Does the narrative description of the district include a concise history of alterations and additions to the resources?
- Is the life span (years of birth and death) of the significant person associated with the district given?
- Have the beginning and ending dates of period of significance been explained?
- Does the statement of significance support the district's level of significance as selected?
- Has the narrative statement of significance been documented with either footnotes or endnotes?
- Does the statement of significance focus on the criteria for evaluation and the areas of significance that apply?
- Has a map showing the locations of contributing vs. non-contributing properties been included?
- Is a USGS Quad map included? Only one copy of each quadrangle map is required.
- Are the black and white photos correctly labeled and included in duplicate?
- Is the one set of correctly labeled 35mm color slides included?
- Has a copy of the nomination on a 3.5 disc been included in the packet that you are sending to OAHF?
- Has a map showing the location and ID number of each tax lot within the boundaries of the district been included?

NATIONAL REGISTER HISTORIC DISTRICTS

The following is a list of historic and archaeological districts, which are currently listed on the National Register in Washington State. Copies of any of the historic district nominations are available for research purposes. Note that some district nominations are single parcels which have numerous resources on them and were thus nominated as districts. The abbreviations signify the following: **WHR/NR**: Both listed on both the Washington Heritage Register and the National Register, **WHR**: listed only on the Washington Heritage Register, **WHR/DOE**: listed on the Washington Heritage Register and determined eligible for the National Register, **NHL**: listed as a National Historic Landmark.

**IN ITS SIMPLEST FORM, ARCHITECTURE IS ROOTED IN ENTIRELY FUNCTIONAL
CONSIDERATIONS, BUT IT CAN REACH UP THROUGH ALL DEGREES OF VALUE TO THE
HIGHEST SPHERE OF SPIRITUAL EXISTENCE, INTO THE REALM OF PURE ART.**
Mies Van de Rohe
